

SEED Group

Engineering, construction, materials and specialist products.

Founded in 2016 and based in Islamabad, SEED brings together in-house engineering, construction delivery and specialist product development.

Businesses and capabilities

SEED Works, Systems, Design and Defence operate within SEED (Pvt) Ltd. SEED Chemicals and SEED Materials are separately incorporated businesses under common ownership.

Engineering and delivery

Civil works, structural steel, building services and design coordination support industrial facilities, infrastructure and specialist buildings. Historical project experience includes a helicopter MRO hangar completed in 2020 and a semi-automated CLC plant commissioned in 2022.

Specialist products

CLADRA is the architectural GFRC brand of SEED Materials; TENSYL is a SEED Chemicals brand. LATTIX is the group space-frame programme. Product scope, supply availability and project requirements are confirmed with the relevant team. SEED Labs records research and development separately from completed delivery.

Parent-company credentials

Solutions For Efficient Engineered Design (Private) Limited holds PEC licence 861, Category CA, valid through 2029-06-30. SECP registration: 0099389. Parent management-system certificates for ISO 9001, ISO 14001 and ISO 45001 state validity through 2027-07-29, subject to surveillance. They do not certify individual products or separately incorporated businesses.
